APOORV GUPTA

aprv.gpa@gmail.com

Organization: **Saxo Bank (June'17 – Till Date)**

Designation: Senior Associate

Projects:

- **Tradingfloor:** Tradingfloor is a social platform for the various traders of Saxo Bank, where they can post, discuss about various aspects of trading. I am responsible for the maintenance of the various components of the website. Also, in planning and executing any functionality changes/addition. On the front-end side Vanilla JavaScript is being used, whereas on the backend side .NET is being used. Mongo DB is used for database. (15 Months and still going on)

- **Digital Onboarding:** Digital Onboarding comprises digital forms that are used for onboarding new clients. The main objective is to digitalize the manual process of onboarding a client, by allowing them to fill in their details online. In it, form fields are modularized and added to generate custom forms. I am responsible for designing new form fields, adding additional functionality to existing form fields. JavaScript and jQuery are being used on the front-end side, whereas on the backend side .NET is being used. I investigate front-end as well as back-end. (15 Months and still going on)

- **Tiles Exercise:** The main objective was to get familiar with the React/Redux technology. A small application had been made to render tiles with image and title, which on being clicked navigated to a detailed version of the tile. Node modules and Webpack was employed to facilitate the process. A custom express server had been created to incorporate the REST API. The data was requested through a JSON file and the same file was dynamically updated for the PUT requests. Also, LESS was used for the styling purpose. (2.5 weeks)

- **To Do App:** It was intended to provide a hands-on experience with the React/Redux technology. Firstly, I made it in plain JavaScript without ES6. In the next phase, I included the features of ECMA6, and then I incorporated React/Redux.

Organization: **Sapient Consulting Pvt. Ltd (July'13 – May'17)**

Designation: Associate Technology L2

Responsibilities:

- Developing full-fledged website with variety of content, ensuring that it is fully optimized with HTML scripts, and CSS framework.
- Responsible for developing HTML for various browsers and maintain CSS framework and identify and resolve all issues on same.
- Monitor and ensure high quality control on both designs and code for website.
- Estimating, Planning, Managing timelines for development.
- Developing responsive websites with cross browser compatibility.
- Developing PWA for different websites, while taking care of the issues in different environments.

Technical Strengths:

- Hand coding
- E-commerce integration
- Integration of API's of social media sites – Twitter, Facebook, YouTube, Tumblr

Projects:

- **SAP Careers:** The main objective was to redesign SAP Careers website. Apart from HTML, CSS, Jquery library was employed to develop various components like Tiles, Image Component, Carousel, Header, Footer. My roles & responsibilities included understanding the functionality and behaviour of a particular component on the original website, and then creating that component in the new website, with the same functionality, as per the new design structure. (Duration: 7 Months)

- **Van Cleef & Arpels:** The main objective was to redesign VCA website. Involved usage of HTML, CSS, JavaScript, JQuery, JSON, Facebook Graph API, Twitter API, Youtube API. Components developed were social share, social feeds. My roles & responsibilities included understanding the functionality and behaviour of a particular component on the original website, and then creating that component in the new website, with the same functionality, as per the new design structure. Also, I was required to integrate the same with the backend team and help them wherever they get stuck in terms of front-end issues. (Duration: 8 Months)

- **HireBuddy:** Involved in front end development of various components by leveraging the features of SASS framework, Bower and Grunt. The code was primarily developed in native Java Script. And, for the CSS part selected components of the bootstrap model were used. A PWA equivalent of the site was also made. My roles & responsibilities included interacting with the client for understanding the requirements and sharing the same with the team, analyzing the wireframes and design documents, and reverting them back to the design team for incorporating appropriate feedback. I was also involved in the development of various components like navigation, search and listing. (Duration: 6 Months)

- **Brown Advisory:** Involved in front end development of various components. Mainly used Angular JS framework for the development purpose. Created directives like Drag/Drop, Expand/Collapse. SASS was used for the styling purpose. My roles & responsibilities included interacting with the client for understanding the requirements and sharing the same with the team, analyzing the wireframes and design documents, and reverting them back to the design team for incorporating appropriate feedback. I was also involved in reviewing the code done by my team members, integrating the code with the backend team and helping them wherever they get stuck in terms of front-end issues. Apart from this, I participated in knowledge sharing sessions to give an understanding, about the component developed, to the team members. (9 Months)

- **Sydney Opera House:** The main objective is to redesign Sydney Opera House website. Apart from HTML, CSS, JQuery library is being used to develop components like Carousel, Seat Selection, Package Selection, Checkout, Login, Register. A PWA equivalent of the site was also made. My roles & responsibilities included understanding the functionality and behaviour of a particular component on the original website, and then creating that component in the new website, with the same functionality, as per the new design structure. Apart from the development I review the codes of my team members, hold meetings with the on site design team to discuss various potential risks & suggestions. I am also responsible to make the site completely accessible compliance to the AA standard. (Duration: 10 Months)

<u>**Key Skills:**</u>

- **Languages:** HTML, CSS, JavaScript
- **Libraries:** jQuery, React, Redux
- **Frameworks:** Bootstrap, AngularJS 1.2, SASS, LESS
- **Templating Engine:** Mustache
- **Development Tools:** Eclipse, Sublime, Brackets, Visual Studio, TortoiseSVN, SonarQube, Maven, JIRA, Notepad++, Grunt, Bower, Webpack, GIT
- **OS:** MAC, Windows

<u>**Additional Skills (Beginner Level):**</u>

- Java, C#, JSP, Mongo DB, MySQL

Academic Qualifications

Degree/Certificate	Institute	Duration	Major	CGPI/ Percentage
Bachelor of Technology	NIT Hamirpur	2009 to 2013	Computer Science and Engineering	7.64/10
ISC-08	Mercy Memorial School, Kanpur	2007-08 (Intermediate)	Physics, Chemistry, Mathematics	88.6%
ICSE-06	Mercy Memorial School, Kanpur	2005-06 (High School)	Science, Mathematics	88.2%

Extracurricular Initiatives

- Core member of Cultural team, SAPIENT ALIVE, of Sapient Gurgaon
- Participated in various cultural shows held in Sapient
- Actively involved in CSR activities by Sapient such as Silent Auction, Pinkathon
- Served as Convener of Dramatics Club, Cultural Fest '11, NIT HAMIRPUR
- Interests: Acting, Dancing, Script writing, listening to music, Watching movies
